

This is to certify that

Sam Sample Class 4

*has participated in the International Benchmark Test
in Science (Level 1)*

YOUR RESULT

Results from some other countries

This report shows how your child performed when compared to the students participating in the Trends in International Mathematics and Science Study (TIMSS). The dot under "Your Result" indicates your child's score. The line drawn across the different countries shows how your child's performance compared to students from other countries. TIMSS is a large-scale international study of mathematics and science at Grade 4 and 8. Forty-six countries participated in the 2003 study. The average age of students participating at Level 1 was 10.3. For more information about TIMSS go to www.timss.acer.edu.au
