

International Benchmark Test in Science

(LEVEL 2)

SCHOOL REPORT

Sample School June 2007

This report shows how your school performed when compared to the students participating in the Trends in International Mathematics and Science Study (TIMSS). TIMSS is a large-scale international study of mathematics and science at Grade 4 and 8. Forty-six countries participated in the 2003 study. The average age of students participating at Level 2 was 14.5. For more information about TIMSS go to www.timss.acer.edu.au
